CAREER PROFILE

My experience of 5 years in the IT&C Department of a large university in Bucharest, Romania helped me gain relevant hands-on IT skills and knowledge within web development, Windows OS, Windows Servers, network troubleshooting, user support (lines 1,2,3).

My competencies are within web development and content management, installing, configuring and joining to the domain computers, and installing and administrating servers, offering end user support in their daily tasks and researching and troubleshooting errors.

I'm on the process of extending my IT knowledge by learning how to code more efficiently and finding solutions to problems by attending the Full Stack Software Development Diploma offered by Code Institute Ltd Dublin, Ireland. Furthermore, I am following the courses at UiPath Academy - Robotic Process Automation (RPA) Developer certification, as I am interested in how to optimize and enhance user's daily business processes.

CAREER HIGHLIGHTS

- With a small team of 4 IT&C people, we successfully offered daily and overtime user support and troubleshooting errors (from hardware to software issues) to 2500 people (professors, staff and students), installed, configured and administrated Windows based computers and Servers, administrating and extending the two local networks(Intranet and Internet), implemented the eLearning platform with Moodle, administrated and developed the two official websites of the Police Academy and The National College for Internal Affairs.
- During my time as the official websites' administrator, I have updated the pages with over 55.250 new information entries.
- Improved the Active Directory servers by taking the initiative and through research I have migrated the Active Directory servers from Windows Server 2008 to Windows Server 2012.
- Efficiently provided IT support, besides and together with the above tasks, in the annual recruitment process where we had over 30.000 candidates during my 5 years.

InfoAcademy Bucharest, Romania

CISCO CCNA1 **2014;** CISCO IT Essentials **2013**

Police Academy "Alexandru Ioan Cuza" Bucharest, Romania 2008/2011

Bachelor's degree, Study of Law Enforcement and Public Order

PROFESSIONAL EXPERIENCE

Police Academy "Alexandru Ioan Cuza" Bucharest, Romania   June/2013-June/2018

The Police Academy is the single high-level University that trains future law enforcement officers and offers Master and PhD degrees for future training and development.

My role in the University was within the IT&C Department as IT Specialist Officer in a team of 4 people to support 2500 people, professors, staff and students.

IT Specialist Officer   August/2014 - August/2018

In addition to the tasks performed as IT officer, I also did the following:

- Administrating, maintenance, backup of the Windows servers and installing, configuring and joining to the two domains new servers as virtual machines. (10 servers)
- Established administrator and developer for the two official websites and I was responsible for examining daily the integrity of all the pages, links, developing new web pages, updating with information entries from all of the departments, backup and archiving old data, elaborate monthly reports for the management with outdated data or missing information.

IT Officer   June/2013 -March/2014

- Installed, configured and joined to the AD (Internet and Intranet) several computers with Windows Operating Systems (from XPSp3 to Windows10) and configuring users email addresses, rights on the Shared Public Folder and local or network printers. Was responsible for troubleshooting errors on joining one of the domains, email client failure, Windows errors. The total amount of computers was over 500.
- Weekly maintenance and troubleshooting the two networks (Internet and Intranet) and solved connection problems for the users as fast as we could find the problem. We had several switches which span all over the campus site.
- Providing weekly and monthly support to the Financial Department by installing and configuring software updates for their programs, solving network related errors, installing and configuring security certificates and tokens. (Intranet)
- Improved the Active Directory servers by taking the initiative and through research I have migrated the Active Directory servers from Windows Server 2008 to Windows Server 2012.
